Motivation

I am always in search of work that can inspire my creativity and teach me new skills. Automation and simplification of user experience is where my passion lies. I hope to find a role within a team that fosters inclusion, creativity, and friendship where I can use my leadership experience to make ours a team where everyone can do their best work.

Education

University of Minnesota – Twin Cities

2009 - 2014

B.S., Computer Science

Honors: Dean's List

Experience

Software Engineer 2

July 2016 – Present

Microsoft

- > Created internal development tools and system health monitoring tools
- > Led migration of over 1 million customers' data from HockeyApp/Test Cloud to App Center
- > Shipped code in Ruby, Javascript, Typescript, Bash, Java, and a few lines of Clojure

Engineering Lead

February 2015 – July 2016

Xamarin

- > Led development of Xamarin Test Recorder from infancy through full-support release
- > Created a Mac app, Visual Studio & Sublime Text extensions, and Android/iOS libraries
- > Product was featured in Microsoft Build and Xamarin Evolve conference keynotes
- > Learned product planning, team leadership, and becoming comfortable outside of my comfort zone

Mobile Automation Engineer

February 2014 – February 2015

Xamarin

- > Gave live demos, technical explanations, and customer support in sales calls
- > Worked with the engineering team to implement customer-requested features
- > Learned how to work effectively with customers and turn customer desires into features
